ViTelNet
SCALABLE CONNECTED CARE

Remote Patient Monitoring
Product Sheet

Our Remote Patient Monitoring system simplifies home and post-acute patient surveillance with:

+ Biometric data capture from peripheral devices
+ Disease specific patient health surveys
+ Messaging
+ Education

Engage patients from the comfort of their homes. Manage populations at scale cost effectively.

Use Cases
+ Chronic disease management
+ Post-acute monitoring

BYOD – Bring Your Own Device

Patient can use own mobile device, along with peripherals you supply

RPM Kit Options

Protective mobile case containing off-the-shelf peripheral devices and tablet preloaded with ViTel Net software to:
+ Manually or automatically capture medical data
+ Video conference
+ Survey patient with disease-specific education modules

Simplified population management for clinicians
+ Web-Based portal
+ Single interface for monitoring multiple different medical disorders
+ Population dashboard ordered by severity with ability to drill down to individual patients
+ Graphical or textual visualization of data over time with configurable normal range parameters
+ Customizable questions per patient, based on protocol
+ Enables video conferencing between the patient and care team

Automating and simplifying data and work flows, so clinicians can focus on patient care, anywhere.

ViTel Net Advantage	Why that matters
Highly configurable with customizable Disease Management Protocols	**Improved clinician efficiency** Proactive healthcare management with workflow optimized to meet your clinical needs
Device agnostic	**Freedom of choice** BYOD or not, you decide!
Aggregated patient data	**Ease of access** Relevant data available to care teams in any setting for seamless transitions of care
Single sign-on across multiple applications, configured to clinician's preferred workflow	**Rapid provider adoption and acceptance** Elimination of frustrations with multiple logins and difficulty finding the relevant patient data.
User friendly	**Easy and intuitive** + Improved compliance for better outcomes and reduced rehospitalization + Configurable out-of-range alerts

Benefits

Convenience
Eliminate patient travel time and missed apointments

Improved quality if care
Heightened patient engagement & improved self-care

Cost savings
Avoid readmission penalties and treat patients in a lower-cost setting
