ViTelNet
SCALABLE CONNECTED CARE

Remote Critical Care

Remotely manage patients in your isolation units

Remote care teams can round on or support on-demand consults for patients from the nurses' station or a remote location.

Minimize the need for staff to enter the isolation unit for greater staff safety and decreased demand for PPE.

+ Auto-connect enabled mobile telehealth devices for unmanned utilization

+ Observe the patient and medical devices in the isolation room with remote controlled, pan-tilt-zoom camera or tablet camera

+ Multi-party conferencing for care team collaboration

Our **vCareCommand™** cloud platform supports scheduled routine rounding, as well as on-demand consults for patient state changes.

Easy to use – just click & go with intuitive interface and EHR integration for automated census management

Features	Benefits
+ Point of care auto-answer to check on patients or residents	+ Minimize staff exposure to infectious disease
+ Remote controlled camera with Follow My Finger™ technology for clinicians	+ Reduce consumption of scarce PPE resources
+ Documentation capabilities during remote visit	+ Optimize staff and resources through automated prioritization of patients
+ Future-proof, cloud-based, HIPAA secure platform and hosting (no extra hosting charges)	+ Enhance medical readiness and population health
	+ No downloads or installation
	+ Includes full maintenance and 24/7 support

Optional add-ons

+ EHR integration for seamless work and data flow
+ Embedded medical imaging with PACS integration

+ Interpreter-on-Demand integration
+ Integrated medical examination devices
