

vCareXpress™

Ready to Launch | Turnkey Virtual Care

Solution Overview

For providers looking to get their direct to patient or school based health clinic programs started, or those looking to pilot a new service line before investing in a tailored implementation; ViTel Net's vCareXpress delivers turn-key virtual care web applications for rapid deployment that shorten time to ROI while reducing startup costs. Powering telehealth programs with a set of essential capabilities designed to connect patients and providers with a streamlined and simple user experience.

Ready to launch, ViTel Net's

pre-configured virtual care web applications provide lightning fast time to market.

Connect patients and providers with a powerful package of essential virtual care capabilities right away.

1 Select optional functionality to align with program needs

2 Begin user training and onboarding

3 Launch communications and go live!

CURRENTLY AVAILABLE

Use Cases

- + Patient to provider Behavioral Health
- + Patient to provider Primary Care Clinics
- + Patient to provider Urgent Care Clinics

Scheduling - Streamline management of patient and provider appointments across multiple clinics with turnkey scheduling

Embedded Multi-party Videoconferencing - add language interpreters, family care givers or additional care team members to any consult

Documentation - capture patient provided information pre-visit and clinical forms that provide the option for providers to document directly in the EHR or in the telehealth encounter

Patient Provided Images - patients can attach photos to the telehealth encounter for provider secure access and review

Technology Self Test - enables patients and providers to ensure their equipment is working and ready for a successful virtual visit with access to helpdesk support if it is not

Virtual Waiting Room - enables patients to check in for their virtual visit and consume content while they wait privately for their visit to begin

Secure Messaging - Increase patient and provider engagement with easy to use secure messaging that includes the ability to share images and documents

Notifications and Alerting - automated email and SMS notifications and alerts reduce no-shows and keep patients and providers engaged and on-time.

Basic Reporting - Improve program oversight with telehealth business intelligence

Optional Features

On-demand Language Interpretation - compliance and clear provider to patient communication, in just 3 clicks and within 5 min or less

Advanced Analytics and Reporting - real-time dashboards and user configurable reports for both clinical and operational key performance indicators

ePrescribe - transmit prescriptions directly to patient pharmacy from within the web app

eCommerce - capture credit card payment or copayment directly from patient online
