

vCarePathways™

Closing the Loop | Optimized Patient Engagement

Solution Overview

Delivering better patient outcomes through closed loop patient engagement, vCarePathways provides configured care management pathways fully integrated with the EHR and complementary to existing virtual visit solutions. Fill the gaps between live visits with orchestrated empathetic AI powered chatbot engagement, educational content, vitals capture and patient activities. vCarePathways keeps patients engaged in their care plan and gives providers valuable insight for timely interventions and more productive follow up visits throughout the patient's journey.

CURRENTLY SUPPORTED

Use Cases

- + Surgical procedure pathways
- + Behavioral health management pathways
- + Chronic disease management pathways
- + Rehabilitation pathways

Single Sign-On - Drive adoption with our integrated single sign-on approach that simplifies user experiences by eliminating extraneous logins while enhancing security by centralizing user management.

Consent Management - Automate informed consent process with patient electronic acceptance that can be attached to the patient record in the EHR upon completion

Configurable Pathways - Providers can assign patients to pathways that have been configured to the health system's protocol

Empathetic AI Chatbot - For human-like automated patient active engagement and collection of key subjective information

Timed Content Delivery - Ensuring the patient gets the right educational content and assignments at the right points along their journey

Secure Messaging - Increase patient and provider engagement with easy to use secure messaging that streamlines collaboration and content sharing (images, documents, and more)

Medical Device Integration - Asynchronous connected devices for vitals capture of monitored patients

Worklists and Clinical Dashboards - Tools to enable providers to efficiently manage patient populations throughout their journey

Notifications and Alerting - Configurable email, SMS notifications and alerts that keeps patients engaged and providers aware at all times

Robust Reporting and Analytics- Drive informed decisions and proactively address operational deficiencies with comprehensive telehealth business intelligence that aggregates operational, clinical, and financial data across the organization
